

role : act as full stack website developer objective :create a portfolio website professionally for an cinematographer instructions : make it black and white theme add the logo and name on the homescreen add other data on different pages

data :https://www.instagram.com/stalinoview?utm_source=ig_web_button_share_sheet&igsh=ZDNIZDc0MzlNw add the data which is on this instagram profile

Here is a complete, professional portfolio site structure for a black-and-white themed cinematographer brand "stalinoview", using content adapted from the Instagram profile.^[1] ^[2]

Overall concept

- Theme: Pure black & white, high contrast, minimal typography, lots of negative space.
- Brand: "stalinoview" as the studio name, with the cinematographer identity connected to "STALIN KUDUMULA / dop_stalin07".^[2] ^[1]
- Pages: Home, About, Portfolio, Services, Contact.

You can implement this as a React/Next.js site, or plain HTML/CSS; code-ready structure is below.

Home page (logo + name only)

Content and layout:

- Fullscreen black background.
- Center: logo (you provide), under it the brand name.

```
<section class="home-hero">
  <div class="hero-center">
    
    <h1 class="brand">stalinoview</h1>
    <p class="tagline">Cinematic visuals. Real stories.</p>
```

```
</div>
</section>
```

Styling idea (black & white):

```
body {
  margin: 0;
  background: #000;
  color: #fff;
  font-family: system-ui, sans-serif;
}

.home-hero {
  min-height: 100vh;
  display: flex;
  align-items: center;
  justify-content: center;
}

.brand {
  letter-spacing: 0.4em;
  text-transform: uppercase;
}

.tagline {
  color: #aaa;
  font-size: 0.9rem;
}
```

Header (visible on all pages except pure splash if you want):

```
<header class="site-header">
  <a href="/" class="brand-mini">stalinoview</a>
  <nav>
    <a href="/about">About</a>
    <a href="/portfolio">Portfolio</a>
    <a href="/services">Services</a>
    <a href="/contact">Contact</a>
  </nav>
</header>
```

About page

Use details inferred from dop_stalin07 and the profile description.[\[1\]](#) [\[2\]](#)

Key points to include:

- Name: "STALIN KUDUMULA".
- Roles: Visuals creator, founder of stalinoview, wedding & cinematic shooter, based in India (Hyderabad vibes from tags like tankbund, etc.).[\[2\]](#) [\[1\]](#)

- Focus: Weddings, pre-weddings, song shoots, birthday shoots, commercial shoots, model shoots, short films. [2]
- Email: dineshkudumula4@gmail.com. [1]

Example structure:

```
<section class="about">
  <h2>About</h2>
  <div class="about-grid">
    <div>
      <h3>STALIN KUDUMULA</h3>
      <p>Visuals creator & founder of <strong>stalinoview</strong>, crafting cinematic st
      <p>Blending street aesthetics, bold fashion and intimate moments, the work focuses
    </div>
    <div>
      <p><strong>Based in:</strong> India</p>
      <p><strong>Roles:</strong> Cinematographer, Wedding cinematographer, Visual storyte
      <p><strong>Email:</strong> <a href="mailto:dineshkudumula4@gmail.com">dineshkudumu
      <p><strong>Instagram:</strong> <a href="https://www.instagram.com/stalinoview" targ
      <p><strong>Founder handle:</strong> <a href="https://www.instagram.com/dop_stalin07
    </div>
  </div>
</section>
```

All text here is paraphrased from the Instagram profile bio and posts. [1] [2]

Portfolio page

Use grids for categories based on profile content and hashtags. [3] [4] [2]

Recommended sections:

- Cinematic Reels (general)
- Weddings & Pre-weddings
- Model & Fashion Shoots
- Street & Urban
- BTS & Color Grading

Data you can map from Instagram:

- Bio line: "Weddings|pre-weddings|song shoots|Birthday shoots|commercial shoots|Model shoots|Short films". [2]
- Example reels/posts:
 - Street videography, urban vibes. [2]
 - Wedding cinematic reels & invitation cards. [5] [2]
 - Color grading transformations ("From flat to cinematic"). [6]
 - BTS with Sony Alpha. [7] [5]

- Motivational / "Anything can be cinematic" reel.^[4]
- Sivaji / Rajinikanth themed cinematic edit.^[8] ^[9]

HTML structure (you will plug actual thumbnails and URLs):

```

<section class="portfolio">
  <h2>Portfolio</h2>

  <h3>Cinematic Reels</h3>
  <div class="grid">
    <a href="https://www.instagram.com/reel/DReEOGfk-0e/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Anything can be cinematic</p>
      <span>Music & lifestyle reel</span>
    </a>
    <a href="https://www.instagram.com/reel/DQ0_kZWk1kS/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Sivaji the Boss edit</p>
      <span>Tribute cinematic cut</span>
    </a>
  </div>

  <h3>Weddings & Pre-weddings</h3>
  <div class="grid">
    <a href="https://www.instagram.com/reel/D0I5ge0EmCN/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Cinematic bride highlight</p>
      <span>Wedding cinematography</span>
    </a>
    <a href="https://www.instagram.com/reel/DRCbW9iibNB/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Warm lighting BTS</p>
      <span>Wedding shoot BTS</span>
    </a>
  </div>

  <h3>Model & Fashion</h3>
  <div class="grid">
    <a href="https://www.instagram.com/p/DQ1rCKGiTUG/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Street fashion portrait</p>
      <span>Male model | Myntra outfit</span>
    </a>
    <a href="https://www.instagram.com/reel/DRh0zvaiYIp/" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Comeback with style</p>
      <span>Attitude & slow-mo reel</span>
    </a>
  </div>

  <h3>Street & Urban</h3>
  <div class="grid">
    <a href="https://www.instagram.com/stalinoview" target="_blank" class="card">
      <div class="thumb thumb-bw"></div>
      <p>Cinematic streets</p>
    </a>
  </div>

```

```

<span>Urban vibes & city aesthetics</span>
</a>
</div>

<h3>BTS & Color Grading</h3>
<div class="grid">
  <a href="https://www.instagram.com/reel/DRHj1tgkoxz/" target="_blank" class="card">
    <div class="thumb thumb-bw"></div>
    <p>From flat to cinematic</p>
    <span>Color grading breakdown</span>
  </a>
  <a href="https://www.instagram.com/reel/DRTrD79CWi4/" target="_blank" class="card">
    <div class="thumb thumb-bw"></div>
    <p>Sony Alpha BTS</p>
    <span>Behind the scenes</span>
  </a>
</div>
</section>

```

Styling idea for grayscale thumbnails:

```

.thumb-bw {
  background: #222;
  filter: grayscale(100%);
}

.card {
  background: #111;
  border: 1px solid #333;
}

.card:hover {
  border-color: #fff;
}

```

All reel URLs and descriptions are paraphrased from the Instagram content and captions.[\[10\]](#) [\[11\]](#)
[\[12\]](#) [\[3\]](#) [\[7\]](#) [\[6\]](#) [\[8\]](#) [\[4\]](#) [\[5\]](#)

Services page

Base everything on the services listed in the profile bio.[\[2\]](#)

```

<section class="services">
  <h2>Services</h2>
  <ul>
    <li><strong>Wedding cinematography</strong> - cinematic coverage of weddings, pre-wed
    <li><strong>Song shoots</strong> - music and concept videos with stylised lighting ar
    <li><strong>Birthday & event films</strong> - highlight edits for birthdays and priva
    <li><strong>Commercial shoots</strong> - brand promos, social media campaigns and pro
    <li><strong>Model & fashion shoots</strong> - cinematic portraits, lookbooks and reel
    <li><strong>Short films</strong> - narrative projects with full cinematography suppor
  </ul>
</section>

```

Each item is distilled from the Instagram bio line of the account.^[2]

Contact page

Use the email from the dop account and push Instagram as primary social.^[1] ^[2]

```
<section class="contact">
  <h2>Contact</h2>
  <p>For bookings and collaborations:</p>
  <p><strong>Email:</strong> <a href="mailto:dineshkudumula4@gmail.com">dineshkudumula4@gmail.com</a></p>
  <p><strong>Instagram:</strong> <a href="https://www.instagram.com/stalinoview" target="_blank">https://www.instagram.com/stalinoview</a></p>
  <p><strong>Founder:</strong> <a href="https://www.instagram.com/dop_stalin07" target="_blank">https://www.instagram.com/dop_stalin07</a></p>

  <form class="contact-form">
    <input type="text" name="name" placeholder="Name" required />
    <input type="email" name="email" placeholder="Email" required />
    <input type="text" name="subject" placeholder="Project type (wedding, song shoot...)" required />
    <textarea name="message" rows="5" placeholder="Share your idea, date and location"></textarea>
    <button type="submit">Send</button>
  </form>
</section>
```

Simple black & white form styling:

```
.contact-form input,
.contact-form textarea {
  width: 100%;
  background: #000;
  border: 1px solid #444;
  color: #fff;
  padding: 0.75rem;
  margin-bottom: 0.75rem;
}

.contact-form button {
  background: #fff;
  color: #000;
  border: none;
  padding: 0.75rem 1.5rem;
  cursor: pointer;
  text-transform: uppercase;
}

.contact-form button:hover {
  background: #ccc;
}
```

If you tell which tech stack you prefer (pure HTML/CSS, React, Next.js, or something like Framer/WordPress), a complete ready-to-paste codebase (with routing) can be generated around this structure.

which is good make it on it

For you, the best option is: build it with simple HTML + CSS (and later add a bit of JS), not a no-code builder.[\[21\]](#)

Why HTML + CSS is better for you

- You said you want to learn web development and also use AI to help, not to replace coding completely.[\[21\]](#)
- A cinematographer portfolio is mostly static pages (Home, About, Portfolio, Services, Contact), which HTML + CSS can handle perfectly without any backend complexity.
- Once the basic version is ready, you can easily move it to Next.js/React later, or let AI convert it for you, so your learning and project both grow together.[\[22\]](#) [\[23\]](#)

How to move forward

- Use the structure already given (5 pages) and implement it as a simple multi-page HTML/CSS site.
- Host it free on GitHub Pages or Netlify; both work great for static HTML.
- If you want, the next reply can be a complete ready-to-upload folder structure:
 - index.html (Home)
 - about.html
 - portfolio.html
 - services.html
 - contact.html
 - style.css

Reply with:

"make full html css code with pages" and it will be generated in one shot for you.

**

make full html css code with pages and add this logo

Here is a complete multi-page HTML/CSS site using your black-and-white theme and logo. Save the logo file as logo.png (or rename in the code) in an assets folder.

File structure

- index.html (Home)
- about.html
- portfolio.html
- services.html
- contact.html
- style.css
- /assets/logo.png (your uploaded logo)

style.css

```
* {  
    box-sizing: border-box;  
    margin: 0;  
    padding: 0;  
}

Upload all these files to your hosting (or a gh-pages / Netlify site), put your logo image as assets/logo.png, and the site will work with your black-and-white logo on every page.

**

run and publish this website

This website is ready to run; to publish it online you just need to upload the folder to a free static-hosting service like Netlify or GitHub Pages.[\[27\]](#) [\[28\]](#)

Option 1: Fastest (Netlify drag & drop)

1. On your computer, create a folder, for example stalinoview-site, and put all files inside it: index.html, about.html, portfolio.html, services.html, contact.html, style.css, and the assets folder with logo.png.
2. Go to Netlify Drop: <https://app.netlify.com/drop>.[\[29\]](#)
3. Drag the whole stalinoview-site folder into the big upload box. Netlify will upload and deploy it and then show you a .netlify.app URL; that link is your live website.[\[30\]](#) [\[29\]](#)

Option 2: GitHub Pages (also free)

1. Create a GitHub account (if you don't have one) and make a new public repository (for example stalinoview-portfolio).[\[28\]](#) [\[31\]](#)
2. Upload all your project files to that repo, keeping the same structure and making sure the main file is named index.html.[\[31\]](#) [\[28\]](#)
3. In the repo, go to **Settings** → **Pages** → **Source**, choose the main branch (root folder) and click **Save**. GitHub will build and give you a URL like <https://your-username.github.io/stalinoview-portfolio/> where your site is live.[\[32\]](#) [\[28\]](#)

If you tell which option you prefer (Netlify or GitHub Pages), a step-by-step guide for mobile or PC (with screenshots-style explanation) can be given next.

**

Connect my project repo to Netlify and auto deploy from main branch

You can connect your GitHub repo to Netlify so every push to `main` auto-deploys, using only the browser UI.^[47] ^[48]

1. Prepare your repo

- Ensure your project is pushed to GitHub with this structure at the repo root: `index.html`, other `.html` files, `style.css`, and `assets/logo.png`.
- Check that your default branch is `main` (GitHub shows this on the repo home page).^[49] ^[50]

2. Create a Netlify site from Git

1. Go to <https://app.netlify.com> and log in (Google/GitHub login is fine).^[51] ^[52]
2. On the Netlify dashboard, click **Add new site** → **Import an existing project**. Choose **GitHub** when asked for the provider.^[53] ^[51]
3. Authorize Netlify to access your GitHub account and select the repository that contains your portfolio code.^[47] ^[53]

3. Configure deployment from `main`

1. In **Basic build settings**:
 - **Branch to deploy**: select `main`.
 - **Build command**: leave empty (because this is pure HTML/CSS).^[48] ^[51]
 - **Publish directory**: type `.` (a single dot, meaning “root folder”).^[51]
2. Click **Deploy site**. Netlify will clone your repo, deploy it, and give you a live URL like <https://your-site-name.netlify.app>.^[48] ^[47]

4. Auto deploy on every push

- After this, Netlify watches the `main` branch of that repo; whenever you `git add/commit/push` to `main`, Netlify automatically rebuilds and publishes the new version.^[47] ^[48]
- You can see deployments under **Site dashboard** → **Deploys** in Netlify, with logs for each build.^[54] ^[51]

If you tell the repository name (for example `github.com/yourusername/stalinoview-portfolio`), a Git command checklist (from local folder to auto-deploy working) can be given step-by-step.
